

## How to get there

From **Bangkok** take the direction of **Saraburi** following Pahonyothin high way No1. When you arrive close to **Saraburi** you will have to take Mittraphap Highway No2 toward **Pak Chong** and **Nakhon Ratchasima**, stay on Highway 2 for about 110km. You will pass by the lake of a dam on your left side, after that lake about 3 km on the top of slope you will reach **Khlong Phai** where you should see a jail on your left a post office and a big pedestrian bridge crossing the 6 lanes.

(From the Airport take the motorway/highway no7/(toll way). Then the ring road/motorway/number 7/Kanchanaphisek rd. Then highway no1 as described above)

### **To Access Khao Yai Thiang**

There are now 2 options, a fast one where most of the road is dirt but quite ok by 2014. The other option where most of the road is very good except the last 1km.

#### **Option 1** (my favorite)

is described after the chapter Wat Khao Jan Ngam because it start from there

#### **Option 2**

Starts from picture 2 of the Access map below

Take the road on your right that is leading up towards the wind turbine generator. The first place to stay is located on your right after about 100m. Once you reach the first village stay on the main road that mean don't really enter into the village. Pass the resort on your left (the one with buffalo statues, water mills, boat, etc) and turn left just after. When you are on very top of the mountain you will pass by a TV antenna and then start going down. You will enter a village with a lot of places to stay. On the way down you will pass by a Mosque on your left, when you reach the first intersection turn right then left at the second intersection. Pass the Bouddist temple on your left. Take the road on your right going uphill, it will get very steep. When you are on the top of the steep road the best option is to turn left, there is a little camp house. From there (look at “detailed map of Khao Yai Thiang and Khao Jan Ngam” you are at A point) follow that rd for about 200 and turn left. Then at the next intersection take a left (there is another little house). Keep going 50m and turn right the rd is going down hill. The again turn right and stay on this rd until you see the boulders on the other side of the valley. (If you stay on this rd you will reach Khao Yai Thiang West sector) The little path going to the other side (KYT east) is about 50m before the sector of Khao Yai Thiang West. You should pass beside an old cover for the cows and cross the river.

(Old Access to Khao Yai Thieng West. Turn right when you are on top of the very steep road.

Follow the road until you get close to a group of houses then take left. From there the road will get worse, basically keep going straight (never turn right) then park your car when you see the small broken wind mill turbine (like the one you see in old western movies...) follow the road on your left and you will find the boulders. Refer to the very detailed access map document

**To access Wat Khao Jan Ngam Area** on the main road (Mittraphap) keep driving until you see on your right a golf course sign called “mountain creek golf and resort” and further, trucks weight stations on both side of the road, take the first U-turn. Then on your left you will see shops selling statues, terracotta, etc, a sign saying Wat Khao Jan Ngam prehistoric painting, AND a HUGE sign saying DAIKIN turn just below the huge Daikin sign. Follow the road straight (that means dont turn right to

enter the golf area and dont turn left half way up) until you reach the entrance gate of the temple. You can park just before the gate.

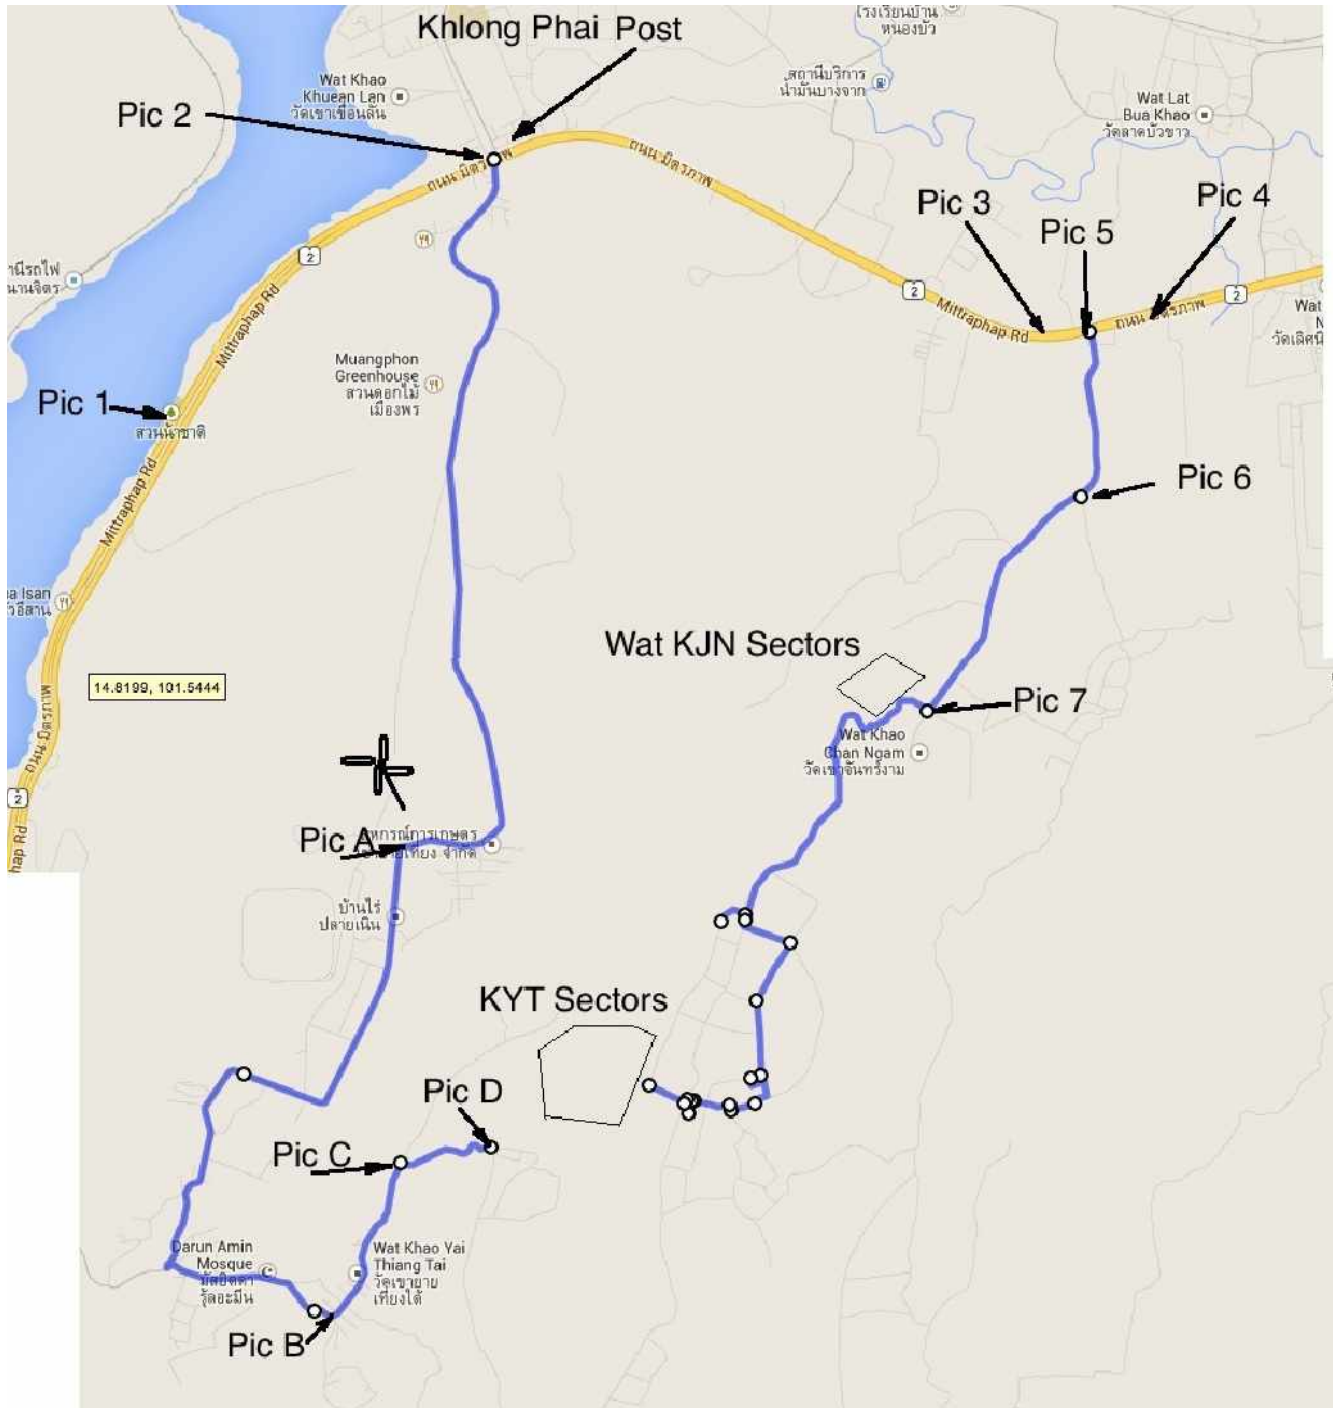

## Access Map

updated online map on <https://maps.google.fr/maps/ms?msid=201469428413746074572.00049e353ef3f2cfea9b2&msa=0>

Note: this is a general map. More details below

KYT=Khao Yai Thaing/Thiang

KJN=Khao Jan Ngam/Khao Chan Ngam

Pic 1. Shows the service area (on the side from Bangkok to Sikhiu)

Pic 2. Shows part of Khlong Phai village, with the long pedestrian bridge crossing the 6 lanes rd. The post is on your left a bit further. The arrow shows one of the rd to access KYT sectors

Pic 3. Shows the huge DAIKIN sign. Take the rd just below to access all the sectors around Wat KJN

Pic 4 (on the Sikhiu to bangkok side) Shows the road signs just before the rd going to the temple (Wat)

Picture 5 Shows the road going to all the sector around the temple (wat khao jan ngam) plus the best access for the upper sectors of "Prove me you deserve it" and Khao Yai Thiang

Pic 6. Straight to the temple

Pic 7 Take the dirt rd on the right to go to the sector of “White Elephant”, “Rainbow Warrior”, “Insane Issan”, “Prove me you deserve it”, and “Khao Yai Thiang East”

Picture A Turn left

Turn right

Picture B Turn left

Picture C Turn right and prepare for the very steep road which is covered with concrete now

Picture D (POINT A on the detailed map below). To access to Khao Yai Thiang East and West take the dirt road on the left (check the online access map as roads keep changing) *An old access mention below is also possible but not the best by now 2014*

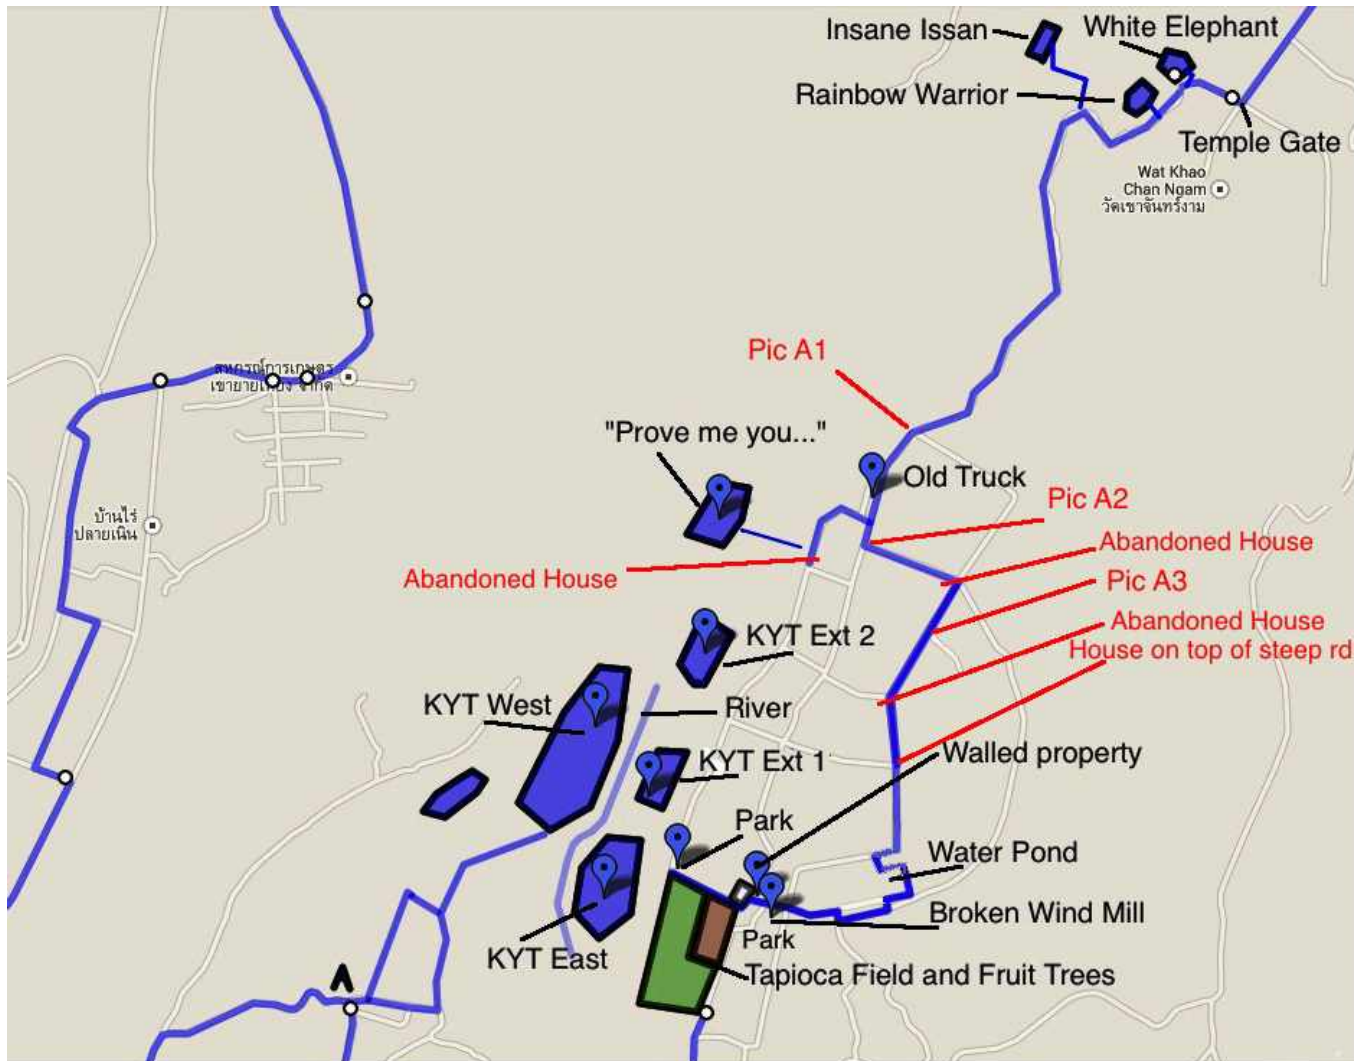

*Picture 12. Turn left to access Khao Yai Thiang East "J-Tree". Then you have to always keep left (straight) at every junction. You will see the high voltage line after sometime, you have to head towards them and pass below the power lines. If you turn right at this junction there are some ressort where you can plant your tent and have shower for about 100/150bath.*

*Picture 13. Park and walk, take the first left seen on the picture above, then go toward the valley, when you reach it, turn right and go further about 100m, the boulders are there on your right. (you should be turning around a tapioca field)*

## Detailed map of Khao Yai Thiang And Wat Khao Jan Ngam Area with access rd

### Access to “Prove me you deserve it”

Once you have taken the dirt road next to the Temple Gate stay on the dirt road until you come out of the forest. (Picture A1) Pass the abandoned truck on your right (about 300m after you come out of the forest) and take the first road on your right (90°) (note that there are much bushes and trees coming over the road). Park after the curve where you should see some blue fabric on the fence. Follow the fabric in the trees for about 400m. Direction 280° WNW

Pic A1 Shows what you see when you come out of the forest

Go straight (slightly left)

Access to KYT. Stay on the good dirt rd as mentioned on the pictures and the detailed map.

Pic A2 Turn 90° left

Pic A3 go straight. Note that it will get steeper.

Once you have turned around the water reservoir take a left and a right just after

Turn right and pass by the small broken wind mill

Keep going straight and look for the walled property

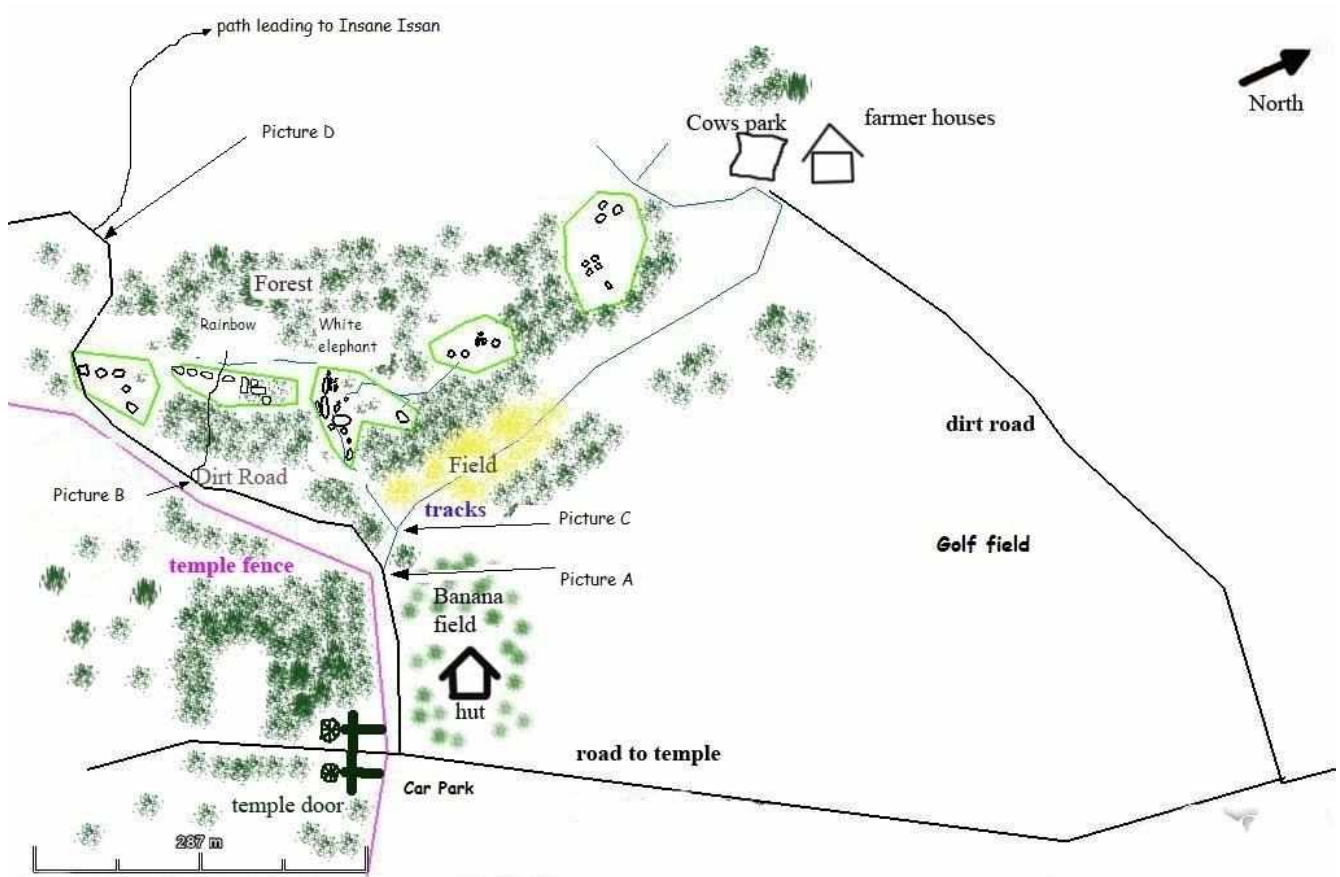

Walled property. Park around there or turn around it and keep going as shown on the map. It will depend on the shape of the road and the trees around

While standing in front of the gate, you go up (left) until the angle and then right. Then straight all the way to the end (where the rd takes a right again) cross the fence around there. On the left it leads to khao yai thiang and on the right it leads to the KYT ext 1

## Detailed map of Wat Khao Jan Ngam Area

### Detailed Access

Picture A

From here it is about 200m to Rainbow Warrior Sector, 500m to Insane Issan Sector and 50m to White Elephant Sector

Picture C

From here

it is about 20m to White Elephant

### **Access to Insane Issan**

While walking up the dirt road to Khao Yai Thieng you will see the board shown on Picture D on your left. To go to Insane Issan you have to walk toward the north exactly 360° from a compass and you will reach the slope down of a big walley. When you stand in front of the board and turn back 180 degree and look the big flat rock behind you there is a harrow painted on showing the direction, or 20m along the road there is a sign showing the directions. There are now Signs indicating the direction some plastic slings in the trees (not to be mistaken with the monk's orange fabric wrapping some tree) and some Kairns. Then you may see big water container on your left, the entrance path is about 20 to 50 meters north (downward).

### Without a Vehicule

It is possible to walk around but not ideal (distance are not so long for sportive standards but under thai sun it is another story) If you come by bus you should stop at Klong Pai, from there you take a local Song Teo (shared taxi) or a moto taxi going to Lat Bua Khao. Then you walk to one of the 2 hotels mentionned in the Accomodation paragraph. If you want to walk up to Khao Yai Thieng take the road next to The Temple as explained above.

You can rent motorcycle at Pak Chong (near Khao Yai National Park) in the main street

<http://www.khaoyaimotorcycle.com/index.html>

From Sikhiu you can take a Song Teo beside the 7/11 shop in the middle of the town next to the market or on the main rd in 50m away from greenview (just make sure with the driver that he understand where you are going

### Safety

Carry a mobile phone with you. The emergency no is 1669 rescue/ambulance, I most of the time go climbing alone and never had any problems. The nearest hospital is at Sikhiu on your right when you enter the secondary road going in the actual town same direction with green view. They have the local snake serum. In 7 years I have seen 3 snakes only, 2 on the roads of unknown species and one Cobra in the forest, avoid going to the forest during the night. But the area have Cobras, King Cobras and a kind of green viper, In case of a bite, stay calm, (don't try catching the sanke you risk another bite) call the emergency no1669 explain where you are, disinfect, wrap the spot with bandage applying light tension to slow the venom spread and go to Sikhiu's

hospital. TEL no of the hospital are 044 411 020 / 044 411 704

Info [http://cobras.org/cob\\_7.htm](http://cobras.org/cob_7.htm)

## Other safety issues

Beware if you move stone around landings there might be Scorpions, millepatds, centipedes and millepedes 3 of them can be very painful but they are not so fast.

Bees, wasp, mosquitoes and small flies. The small bees are a joke here. If they come they will disturb you and even sting you if they get caught in your shoes, pants, we don't know why but they love these places... the pain will not last for long (much shorter than western bees) but then it will itch for a while. Wasp: .almost none BUT the big black one are very painful. Essential oil of "Aspic Lavander" is like a miracle for all kind of stings if applied imediately (I would not try to just apply this on a cobra bite tough..)  
Lemongrass oil will repeal mosquitoes and flies. But if you can't bear them anymore, start a small fire with dead leaves (dont burn all the forest during the dry season please)

Cows: (what cows???) yes the local farmer walk his cows thru the sector. They are easily scared so stay at reasonable distance.

Dogs: they mostly bargs, I don't really like dogs and I tend to be scared but never had any problems. Much less than at Hampi, take same stones and a stick to scare them away

## Accommodation

-There is an Hotel (Motel) on the highway, it does not look so appealing from far but they actually have a pretty surrounding with garden. It might not be the nicest place to stay for long periods but it is cheap (about 380 bath), with aircon and hotshower. It is one of the best option if you have no vehicles and intend to walk to the boulders. Just next to the hotel there are some shops selling food although they may not stay open late. It is located between the U-turn and the PTT gas station. They do not have a tel number for booking but they have many rooms and I assume very much it is never full.

### Lat Bua Khao

There is a homestay called "Ban Suan Rim Than" with individual house, etc, starting at 500bath it is the other best option if you have to walk to the boulders. tel number 0866509071.

2 other one located just before the weight station called Ban Noi Resort and Nong Nung hotel (the green building) Price is about 400/500 with aircon. There are some shops around to eat. tel number of Ban Noi 0884657935

### Klong Phai

There is a guesthouse about 100m up way on the right side after you have taken the small road shown on picture 5.

### Khao Yai Thieng

There are tons of guesthouse and homestay but we almost never see anyone so you have to drop by and ask them if they are open or not. If not they will send you to a place open.

### Sikhiu

Another good place is Green View at Sikhiu. It is in the town near restaurants, street food vendors, shops, markets ,massage etc. It is 20 min away from the sectors around Wat Khao Jan Ngam and about 45min to Khao Yai Thieng. They have rooms from about 200 baths to 400 or little house at 500 with double bed or little house with 2 double bed 700, book in advance. tel no 0862569988

### Camping

You can camp at the restaurant in the small village at the beginning of the road (last house on your left) going to wat khao jan ngam. But inform them in advance, there might be no one speaking English when you call so be patient and try again. 0872594047

### Crash-pad rental

There will be 2 crash-pad for rent (from mars 2013) at the price of 200bath per day. They are kept at the restaurant at the beginning of the road (last house on your left) going to Wat Khao Jan Ngam. Please deposit your passport or 2000bath and fill in the form. If you take the pads take the machete too they should not be separated  
thanks

## **Remarques advices and tips**

- Take a machete to clean the landing area around the boulders.
- For camping take hammock with a mosquito net as there could be snake playing around and there are mosquitos for sure...
- The place is not very frequented yet so be careful.
- The most developed places are White Elephant, Rainbow Warrior, Insane Issan, and Khao Yai Thieng East+its first Extension. Prove me you deserve is growing fast tough
- Having a GPS or a smartphone with gps could be usefull

## The Corridor

Khao Yao Thiang "The Corridor"

There use to be a lot of problem around this sector but much have gone back to mother earth (A brush, Chalk and a machete is all it takes to bring them back to life)

### Boulder 1

1 project

2 "Ben's master piece" 6c/7a 5 star problem which take a lot of effort and balance. I gave up once and left it for 2years then I tried it again 20times and was about to give up forever, just a question of body position

3 Joy's problem 6a

### Boulder 2

1 "Camille's angle" 6c?
